

Face Attendance System

Smart, Secure, and Seamless Attendance Solution

Introducing an innovative attendance system designed to enhance accuracy and efficiency.

أحمد ياسر by

Problem Statement

Traditional Systems Flaws

Time-consuming and prone to human error.

Organizational Needs

Require faster, smarter, and more reliable attendance solutions.

Our Solution

Automated Attendance

Face recognition technology for quick check-ins.

User Control

Secure and customized management features.

Efficiency

Saves time and ensures accuracy.

Why Our Face Attendance System Stands Out

Best Solution:

Combines speed, accuracy, and security seamlessly for attendance.

Monetization:

Subscription model and scalable integration for businesses of all sizes.

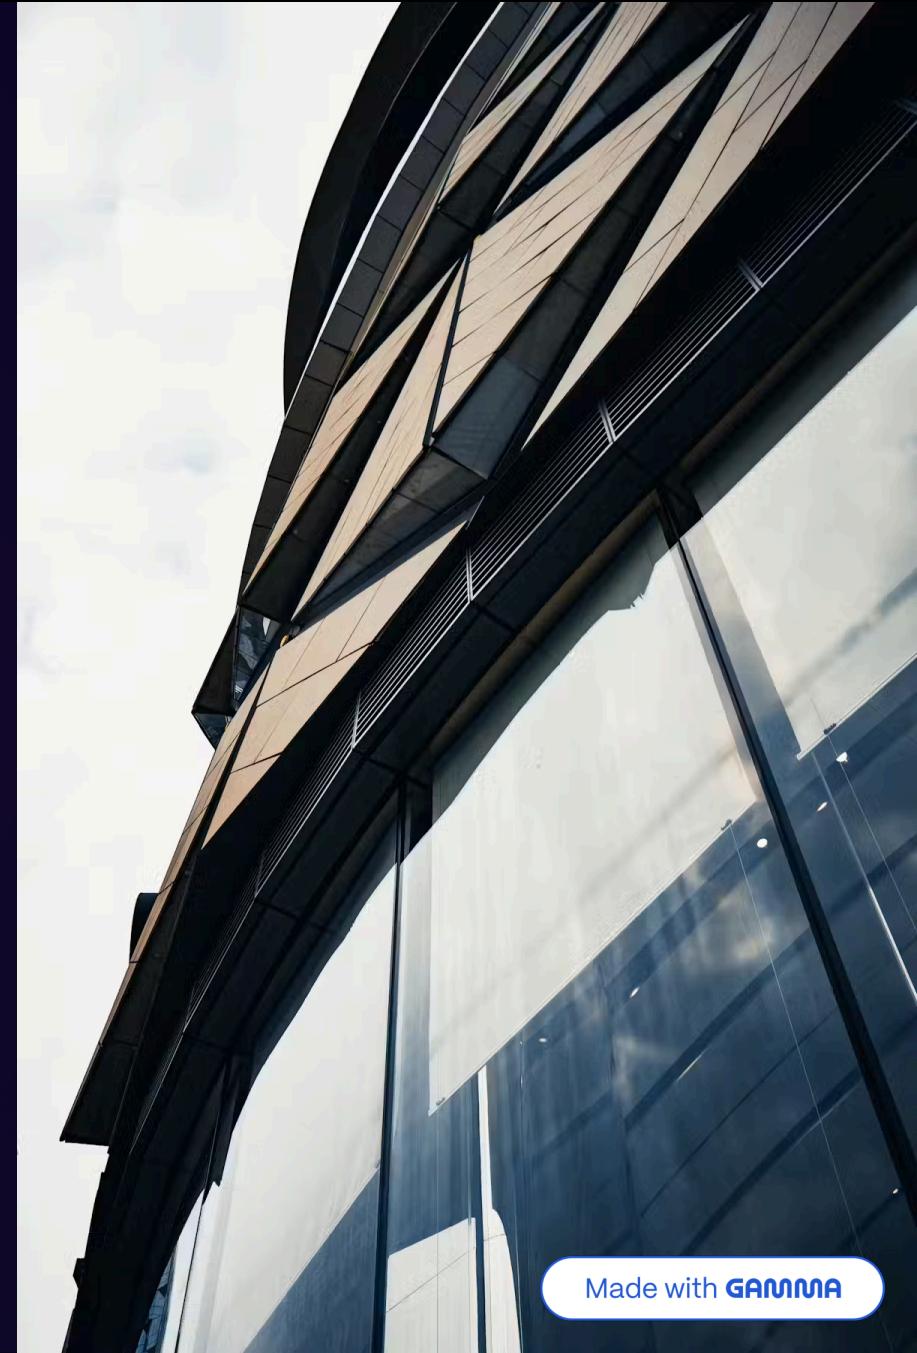

Competitive Edge:

Advanced AI face recognition surpasses traditional and existing systems.

Why Choose Us:

easy access, lower cost, easy to install, and make the process more better.

Key Features

Performance

- Fast, accurate facial detection
- Optimized for low-end devices
- powered by ai

User Control

- Admin and user management
- Manual attendance marking option

Data Handling

- Automatic CSV export
- using sqllite3 for data base
- Smooth PyQt5 interface

Technology Stack

 Python

 OpenCV

 SQLite

 Dlib

 PyQt5

 CSV Storage

Competitive Advantage

Our System

- Face recognition enabled.
- Fast and automated.
- Error-free records.
- Exports CSV files easily.
- can be used in another apps or system or political purposes .

Traditional Methods

- Manual entry prone to errors
- Slow and tedious process
- High error rates common
- Paper-based records

Future Vision

Cloud Sync

1

Real-time attendance data across devices.

Mobile Integration

2

Access and manage attendance on the go.

AI Behavior Analysis

3

Enhanced insights into attendance patterns.

Connecting to street surveillance cameras to identify people for military purposes

Conclusion

Our system revolutionizes attendance with speed and accuracy.

Invest in innovation. Secure your organization's future today.
